

Looking back on 11 years of
making tracks to defeat canine epilepsy,

and still moving forward!

Toby's Foundation continues to support research to develop a DNA test and more treatment options for canine epilepsy. A study supported by a grant from Toby's Foundation for Dr. Karen Munana at NCSU-CVM has been published in The Journal of Veterinary Internal Medicine. To learn more about this study "Effect of Chronic Administration of Phenobarbital, or Bromide, on Pharmacokinetics of Levetiracetam in Dogs with Epilepsy" go to www.tobysfoundation.org and click on the links in our Spotlight feature on our homepage. Thank you for your support.
