Dear Santa,
Please give us the gift of a DNA marker for canine epilepsy this year. We are getting so close!

Love,
Katiya & Stetson

RESEARCH NEWS

The Canine Health Foundation Board of Directors has approved Dr. Patterson's project for "Identification of Idiopathic Epilepsy Genes in Australian Shepherds" to continue his epilepsy research.

This new CHF study is exciting news. As we reported earlier this year, Dr. Patterson and his team got a significant hit on one chromosome in the Australian Shepherd. We appreciate the Canine Health Foundation's commitment to funding research to help improve the lives of all dogs and for funding Dr. Patterson's epilepsy study for Australian Shepherds. Toby's Foundation will support this study for Aussie epilepsy research by becoming a sponsor to help fund it.

Toby's Foundation — Making Tracks to Defeat Canine Epilepsy!
